<b>Office Action Summary</b>	<b>Application No.</b> 10/542,216	<b>Applicant(s)</b> KIM, ANDERSON H	
	<b>Examiner</b> Mr. Terry K. Cecil	<b>Art Unit</b> 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 3-23-2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group IV, claims 42-44 is acknowledged. Claims 1-6, 13, 15-19 and 22-26 are withdrawn from consideration.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 42-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over KR1998-0066632, hereinafter '632 in view of Moriguchi et al. (U.S. 5,736,017). As shown in e.g. figure 2, '632 teaches a frame having openings and a platinum mesh wound horizontally and another mesh wound thereon vertically (the wires are considered to the claimed strip bars, which are interconnected). '632 doesn't teach a rectangular opening nor strip liners made of plated conductive material. However, such is taught by Moriguchi. Moriguchi teaches a frame 30 having a rectangular opening and also strip-shaped mesh members consisting of platinum-plated titanium (the platinum plating is considered to be the strip liner that covers a titanium bar) [as in

Art Unit: 1797

claims 42-43]. It is considered that it would have been obvious to one ordinarily skilled in the art at the time of the invention to have at least one opening of '632 to be rectangular and the strips bars to be the platinum-plated titanium of Moriguchi, since simple substitution of one known element for another (the respective opening shapes and the bar material) for another to obtain predictable results (creation of the electrolytic module) is within ordinary skill.

4. Claim 44 is rejected under 35 U.S.C. 103(a) as being unpatentable over '632 as modified above and in further view of Abrahamson et al. (U.S. 4,923,582). Abrahamson teaches the claimed retainer and clips of claim 44 as shown in his figures.

It is considered that it would have been obvious to one ordinarily skilled in the art at the time of the invention to have retaining/clip of Abrahamson in the modified '632, since such would provide the benefit of connecting multiple layers (units) together.
